

Spring to Attention

Four ways to add some spring to your style!

By Genny Iannucci

Take your wardrobe out of the February freeze with spring's hottest trends – looks that will instantly add sizzle to your style. Here are four ways to boost your look now!

A Bold Stroke of Colour Genius

Take a spin on the colour wheel with bold, bright, vivid colours. Potent coral, vermillion, emerald green, turquoise, yellow, splashy red, hot pink and vibrant purple all vie for a place in the sun and are best worn head to toe, or as solid pieces irreverently and confidently mixed. For a softer take on this trend, contrast upbeat colours with pristine white or turn to striking spring weight tweeds featuring brighter hues.

Block Party

It's time for a block party! Colour blocking is the freshest kid on the fashion block and provides 'notice me' good looks in fabulous footwear, handbags, dresses and tops. Whether in subtle neutrals or bold neon hues, less is definitely more, so limit colour blocking to one fabulous piece per ensemble.

Leader of the Garden Pack

Floral print frocks instantly say spring, and this season dresses offer a veritable bouquet of pretty posies. A far cry from your common garden variety, Asian inspired florals, sweet demure variations and exotic blossoms come to bud in feminine and flirty dresses. Prefer your floral prints in smaller measures? Blouses, scarves and footwear are alternative ways to add some posy power to your look.

Denim Forever

Pale denim with a 70's vibe along with rich dark washes are favourites this spring in more ways than one! In addition to jeans, denim is having a major moment in crisp and sophisticated silhouettes including shirts, skirts, dresses, footwear, jackets and coats.

Keeping it fabulously fresh and fun,

Your friend for all things fashion,

Genny
